**FROM THE OPEN PLAINS OF SOUTHERN AFRICA**

**THE RUGGED AND REMOTE FORESTS OF CENTRAL AND WEST AFRICA**

**AND THE JUNGLES OF ASIA AND INDOCHINA**

**OAMME's** highly pedigreed security personnel are in their natural element, able to operate effectively regardless of work environment, actual (here and now) or implied (longer term) threat, or regional and national political circumstances and challenges.

**The Company and Principals** have the international pedigrees and most importantly the extensive on-the-ground experience to provide clients large and small with:

- Professional security support services at both the tactical and strategic level
- Training of security staff at all levels of field operational deployment (VIP protection teams a speciality)
- Development of appropriate SOPs and preparation of a formal Company Security Policy
- *In situ* security management consultants providing here and now support to field teams and project managers
- Pre-deployment intelligence briefings alerting staff to the tactical risks inherent in their specific area of operations
- Evacuation, emergency response and/or disaster management planning
- Management of Community Relations programmes (health, education, and social infrastructure development at village level)
- Professional liaison with Police and Defence officials at all levels (National, Regional, and local)
- Training of military Special Forces personnel in counter insurgency, counter terrorism and hostage rescue methods
- Training of Close Protection teams for at risk VIPs, political identities, and senior executive management

*Training Special Forces, Sri Lanka*

**OAMME Principals** have extensive operational experience in active service military theatres in internationally diverse conflict zones, delivering training to military formations, Special Forces teams, and managing commercial security for a multitude of multinational resources industry clients (gold, copper, iron ore mining, and oil and gas recovery). Principals have operated in, and delivered services to, clients operating and managing projects in the most extreme operational environments, including regions of serious civil conflict in Africa, Iraq and SE Asia/Indochina Peninsula.

## IRAQ

*Vehicles destroyed by IED action, Baghdad Iraq*

Working with the United Nations to coordinate logistics and security for the first democratic election to be held in Iraq, under threat of Sunni insurgency action to prevent a free and fair vote.

*Coalition Provisional Authority (CPA) Headquarters, The Palace, Green Zone, Baghdad Iraq*

Providing armed security teams to protect logistics convoys resupplying the Iraqi Police Service with new vehicles, donated by the Japanese Government agency **JICS** and escorting large and vulnerable convoys from Trebil on the Jordan border to Abu Ghraib warehouses in Baghdad.

**OAMME** supported major French telecommunications company **Alcatel** in the establishment of modern country wide communications networks, funded by the Government of **JAPAN**, and project managed by **Sumitomo Trading House**.

*Convoy escort team, Iraq*

*Re-equipping Iraqi Police, Japan Govt (JICS) funded police vehicles, Trebil border, Iraq*

## NORTH AFRICA, THE SAHARA, THE SAHEL

**OAMME PRINCIPALS** have supported international investor groups travelling to Mali, Libya, Egypt, Tunisia and Niger, areas of extremely high risk from roaming bands of Islamist terrorists and criminal “kidnap for ransom” groups (including Ansar Dine, below).

**OAMME** provides insightful and detailed advisories relating to the threat of terror attack, kidnap and ransom, and how to minimize risk when travelling in remote and lawless regions of the world.

The Company provides physical protection in situ and coordinates all activities with local security authorities to ensure expatriate technical teams and personnel travelling to high risk are protected at all times.

**The Sahel and Sahara regions of Africa** present unique challenges to international investors and travellers, from being the target of direct terrorist attack, to the ever-present threat of kidnap for ransom.

Islamist groups operate with a degree of relative impunity across the north and east of Mali, the south and west of Niger, and into southern Algeria, attacking major multinational projects and expatriate personnel.

*Ansar Dine fighters, Mali desert area*

Foreigners are considered a target of choice, and unwary or complacent travellers have been abducted from city centres ordinarily considered safe (Bamako, Niamey). Few have survived such abductions.

## NIGERIA

**OAMME Principals** have conducted reconnaissance deployments and escort duties to visiting international mining personnel and investment executives conducting business in central and southern Nigeria.

*Kogi State, central Nigeria*

**OAMME** Principals have provided security support to geological and mining exploration teams working in the north east and north of Nigeria, in areas of intense Islamist insurgency (Boko Haram) and military counter-insurgency operations (Borno, Jos, Kaduna).

Despite claims that recur with regularity from the Nigerian military establishment, Boko Haram remains a clear and present danger to locals and the few remaining international investors considering investment in NE Nigeria. The threat is not confined to traditional BH-afflicted areas, with a deadly attack even having taken place in the Federal Capital of central Abuja, against the high security United Nations offices.

**OAMME** has also supported international clients operating in the Niger Delta, the home of a number of dissident groups opposed to what they consider to be irresponsible exploitation of oil assets, and the failure of the Delta inhabitants to benefit from the revenue generated from oil.

Groups such as MEND (Movement for the Emancipation of the Niger Delta) and the NDA (Niger Delta Avengers) have created serious disruption to Nigeria's oil industry leading to production losses in the billions of dollars.

*(Above and below) Niger Delta Avenger (NDA) rebels at home in the Delta, creating havoc for the Nigerian military*

## **WEST AND CENTRAL AFRICA (SIERRA LEONE, LIBERIA, IVORY COAST, GUINEA, CONGO, AND GABON)**

During periods of civil conflict, political protest, insurgency, terrorist attacks against civil targets, and civil war leading to a complete breakdown in law and order (below 1 Kinshasa Congo, 2 Ouagadougou Burkina Faso and 3 Kano Nigeria).

*1. Rioting in Kinshasa Congo (DRC)*

*2. After effects, Islamist attack against civilian targets in Ouagadougou Burkina Faso*

*3.Suicide bombing of a popular and busy market in Kano, Nigeria*

**OAMME** provides pre-deployment briefings and strategic country security audits outlining current threats, and advises on effective risk avoidance strategies, crisis planning, evacuation procedures in the event of a breakdown in law and order, and disaster recovery plans.

*Meeting local officials, Congo (Brazzaville)*

**OAMME** has provided security support services to clients with assets and operations in countries as diverse as the Republic of Congo (above), and (following page) Libya, Sierra Leone, and Liberia.

*Tripoli Libya*

Australian mining companies have a record of taking an innovative approach to investment in Africa and Asia, being less “risk-averse” than others. Consequently, their personnel are deployed to areas where risk management strategies become more critical, to ensure the safety and wellbeing of staff.

Well researched & focussed security strategies, realistic evacuation processes, and insightful intelligence/information assessments are critical, and require consultancy support from a security advisory company with a proven verifiable track record.

*On the road to Liberia from Sierra Leone*

## SRI LANKA

The **OAMME Principal** has provided advanced military Special Forces training to selected personnel engaged in confronting insurgency and urban terrorism.

**OAMME** has extensive operational experience in active service military theatres in internationally diverse conflict zones, and has delivered training to military formations, Special Forces teams, and managed commercial security for Australian resource industry clients looking at investment opportunities in Sri Lanka.

Training has included Close Protection techniques to official Protection teams (Special Task Force, Sri Lanka Police) working to ensure the security of Presidents, Prime Ministers, and Ministers of Government in Sri Lanka during an intense and dangerous civil war.

*OAMME Principal, training Special Forces*

## **S-E ASIA (INDONESIA, THAILAND, LAOS, CAMBODIA & MYANMAR)**

**OAMME** has provided in-depth security reviews and security audits of mining and commercial operations, presenting innovative solutions, throughout SE Asia, where the threat from Islamist and separatist groups is on the increase.

*Indonesia "Brigade Mobil"(Brimob) paramilitary security support*

With well trained, battle hardened and highly motivated radicals from Islamic State returning to Indonesia, The Philippines, Malaysia, Thailand, and Myanmar, and openly declaring their intention to target expatriate personnel, it is incumbent on multinational operations working through the region to update corporate security planning.

Islamist terrorists (below) have declared their intent to attack non-Muslim targets throughout the region, and deadly attacks have already taken place in Indonesia, Thailand, Myanmar and The Philippines.

*Armed Islamist jihadis, Indonesia*

**OAMME** consultants have extensive on the ground practical experience in Indonesia, Myanmar, Laos, and Thailand, supporting international mining operations regionally.

*Sumatra, alternative site access route reconnaissance*

Services provided have included strategic analysis of threat, retraining of locally recruited guard force personnel, liaison with local security (police, military) authorities to determine threat and capacity to support operations, and the development of close working relationships with local communities.

*Police Brimob detail, Sumatra*

**OAMME** Principals deliver their professional services “at the coalface”, on the ground and through personal engagement with clients and local communities, rather than delivering advice remotely from a comfortable but distant office environment.

*Armed security team, Japan Govt funded project, Iraq*

*In Amman Jordan with Sumitomo’s Iraq operational management team*

OAMME has delivered and continues to deliver “World’s Best” services in **the Middle East, across Africa, South Asia, SE Asia & Indochina, South America, Eastern Europe, and Papua New Guinea.** Wherever the need arises.

*Sebuku coal project, Kalimantan, Indonesia*

*Sebuku coal project, Kalimantan, Indonesia (above and below)*

The **OAMME Principal** was tasked by an Australian mining company to visit the Company's remote mining project located in the **Laos-China border region**, to assess security of staff and assets, and to provide pre-deployment information briefings to management and technical staff.

*Security reconnaissance task, Laos-China border region*

The task also required a strategic audit of national security issues including an understanding of the investment climate, Government attitude towards foreign investment, regional political concerns, and at a tactical level, security and safety of Vientiane-based personnel and assets.

*Access road to project resource, Laos*

*Remote project site, Laos-China border area*

This Project was in an inhospitable region in northern Laos, afflicted by residual threats dating back to the major wars fought in Indochina between 1945 and 1975. Threats included UXB (unexploded ordnance such as US munitions), land mines and a holdover of resistance by Hmong tribesmen who continued to oppose the central Government in Vientiane.

*Northern Laos, approach to project site*

**The OAMME Principal** was tasked by an international mining company to conduct an in-depth strategic security audit in **Sri Lanka**, to assess the level of risk to expatriate and local staff, and substantial corporate investment assets, following the attack by Sri Lankan Tamil (LTTE) insurgents against the crowded international terminal in Colombo.

*Sri Lanka troops secure the international airport after LTTE attack*

*Photo taken from airport main terminal building*

LTTE (Tamil Tiger) insurgents attacked the military airbase at Katunayake, and the main international civil airport.

Panic ensued in the confusion as hundreds of foreign and local travellers fled from the airport. The attack itself caused an estimated loss of USD350 million to Sri Lankan Airlines, caused the tourism industry to plummet by 15% and reinforced the serious concern internationally about Sri Lanka as a secure investment destination.

*The aftermath of the LTTE attack on the airport, Colombo, Sri Lanka*

*Security officials inspect the damage*

**CORPORATE OVERVIEW: OAMME** understands the risks inherent in operating in dangerous and challenging environments, and the Company's highly qualified and regionally experienced Principal and consultants provide sound and effective advice based on firsthand knowledge of the risks at hand.

*Drill Rig destroyed in Sierra Leone (above and below)*

*OAMME vehicle destroyed, "Route Irish" to Baghdad International Airport (BIAP)*

**OAMME** works in areas of hostility and civil war, providing real time, up to date, here and now information to ensure the safety of expatriate and local personnel and their timely evacuation in the event of a deteriorating security situation and an increased threat level.

*Mali soldiers on operations*

**OAMME** has provided and continues to provide strategic and tactical security analysis, and on the ground security consultants, to clients operating in current African “hotspots” including Mali (above), Nigeria, and Ivory Coast (below) during civil war, insurgent activity, or military rebellions, all of which have led to a significant deterioration in the security and investment environment.

**OAMME** works hand in hand with remote communities on social development programmes.

**OAMME** works with local stakeholders, community leaders and political representatives to determine appropriate assistance programmes including the construction of schools, clinics and community assembly and recreational buildings.

**OAMME** encourages community participation in sponsored social projects.

**OAMME Principals and Consultants** understand local traditions, respect local customs and are at ease in any environment.

*Local religious dedication ceremony, Lunsar, Sierra Leone*

Regardless of the location, be it Africa, the Middle East, or Asia, **OAMME** retains an extensive network of local contacts with broad knowledge of the region and high-level connections to facilitate travel to, through and out of the country of focus and activity.

*Local water transport, Middle East*

**OAMME** continues to service clients in SE Asia and in the wider Indochina region.

*North Myanmar (top), Lao Army Protection team (middle), Yangon City, Myanmar (bottom)*

## MILITARY AND SECURITY PEDIGREE AND CREDENTIALS

The **OAMME PRINCIPAL** served with Tier 1 Special Forces units, commencing with the Australian Special Air Service Regiment followed by service with the Rhodesian SAS Regt and the Selous Scouts Regiment (photo below).

Service included active service combat roles in Africa and South Asia, during a defence career spanning 2 decades, before establishing OAM Indonesia and OAMME covering Iraq and Africa, supporting commercial investors and international mining houses.

The **OAMME PRINCIPAL** was contracted by the Sri Lanka Defence establishment for a period of three years, training and advising:

- **Sri Lanka Army** (in counter insurgency operations)
- **Sri Lanka Navy** (in harbour/port defence)
- **Police Special Task Force** (in counter terrorism techniques, training Presidential Close Protection teams, and jungle reconnaissance training)

during the 20-year insurgency mounted by the Tamil LTTE in the pursuit of an independent State - an insurgency that was ultimately defeated by the Sri Lanka Defence Forces.

*Training Sri Lankan Special Forces (above and below)*

*Advising combat military formations in counterinsurgency tactics, Jaffna Peninsula Forward Operating Base*

*Training Police Special Forces Close Protection Teams*

**The OAMME Principal** served, prior to establishing OAMME, for six years in a close personal protection role to **His Excellency Sheikh Ahmed Zaki Yamani**, (below) protecting the Client, his family and a diversity of VIP associates across North America, Europe, the Middle East, South Asia and South America, including the USA, Canada, the UK, France, Italy, Switzerland, Spain, Greece, Russia, Ukraine, Bulgaria, Romania, Turkey, Egypt, Pakistan, Venezuela.

**The OAMME Principal** served for three years as Director of Security in Brunei Darussalam, securing the personnel and assets of **HRH Prince Jefri Bolkiah** (below), brother of His Majesty Sultan Hassanal Bolkiah

Protective duties also included security of high value assets including aircraft, yachts and residential properties (as an example, the Yamani yacht, Lady Sarya, below).

And below, the project originally conceived as Jerudong House located along the South China Sea in Bandar Seri Begawan, Brunei Darussalam, originally a private by-invitation-only residence intended for the Brunei Royal Family, international leaders and VVIP guests.

**OAMME** consultants, having served with Tier 1 Special Forces units, possess the capacity to work in all high risk environments, without constant supervision, formulating and implementing innovative solutions that ensure the security of personnel and investment assets, regardless of the threat, whether immediate or long term, whether tactical or strategic.

Whether providing specialist military advisory services (Sri Lanka, above) in insurgency and terrorism theatres, or advising international companies on corporate security needs, OAMME consultants provide on the ground support, regardless of the threat, regardless of the environment (Iraq, below).
