

OAM in AFRICA and the MIDDLE EAST

OAM provides a total project security management service for international companies with established operations and projects, or for those companies developing projects in Africa and the Middle East.

OAM has world class experience in the design, delivery and review of security and risk management solutions, regardless of the threat environment or risk profile.

OAM solutions can be tailored to suit the needs of both individuals and companies that are considering establishing their operations in any high risk environment.

OAM has extensive hands-on experience in Personal Security Detachment (PSD) operations internationally. OAM can provide secure movement of personnel and high value assets by utilizing a combination of air and ground vehicle assets, subject only to the operating constraints.

The movement plan includes advance route and site reconnaissance, coordination of security assets, and the use of appropriate emergency drills.
