SCC TACTICAL

SITUATIONAL COMMAND AND CONTROL

SCC TACTICAL IS A MOBILE SITUATIONAL AWARENESS, COMMAND AND CONTROL SOFTWARE APPLICATION USING SATELLITE COMMUNICATIONS.

Tracking and Messaging

Nortac Defence SCC Tactical is designed by a team of ex-military specialists who were involved at the very highest levels of operational and frontline conflict.

It is built to service the blue force tracking defence requirements of military and government where beyond line of sight communications is a capability gap for most militaries. This solution uses secure satellite technology that ensures connectivity at any time globally.

Key Differentiating Features

SCC Tactical benefits from the following 'Total' specifications:

TOTAL CONTROL – the client takes total control of the end-to-end system.

TACTICAL COMMANDERS:

- **MAKE OPERATIONAL DECISIONS AND PASS INFORMATION TO YOUR ASSET GROUP OR HQ IN NEAR REAL TIME**

- **COORDINATE FRIENDLY FORCES AT THE TACTICAL LEVEL**

- **RESPOND RAPIDLY TO EMERGENCY SITUATIONS**

TOTAL SECURITY – secure web protocols, password encryption and satellite communication links using the highest commercial AES256 point-to-point encryption to ensure complete information assurance.

TOTAL RELIABILITY - the technology is based on proven military applications and provides robust reliable capability.

TOTAL COMMUNICATION – supports a wide range of devices and communication networks.

Advanced Platform Functionality

Mobile – software quickly and easily loaded on a laptop or tablet device for vehicles or tactical HQ.

Location – GPS positional reports and asset details on map overlays.

Contact – multi-chat messaging Graphical User Interface (GUI), supporting: two-way, one to one, one to custom group or one to all.

GEOSYNC – Send a geofence from platform over-the-air to the SCC Tactical therefore setting routes or flight paths and marking no-go or friendly zones.

POI Sync – Generate friendly or hostile POI on Tactical and send over-the-air to Command Platform for information sharing.

Supported – custom maps, all major file formats recognised.

Security – encryption management module and using AES 256 encryption for communications.

Technology

Leading mapping engine – using the Kongsberg Geospatial mission management application designed specifically for the US DoD and used by most military organisations.

Talk to me – Nortac messaging GUI is designed to be as simple and intuitive as possible with no requirement for long and detailed training.

Where are you? – see where you are in relation to everyone else using the extensive mapping functionality allowing for manual and automatic map data inputs. See up to 100 friendly force positions simultaneously.

SATCOM – constantly updated satellite technology using Nortac Defence satellite devices supplied with SCC Tactical: Whisper (see additional brochure) - a shortburst BLOS data device.

Laptop/Tablet – any standard Windows 8/10 laptop/tablet will power SCC Tactical, essential USB ports are available to load maps. MilDef DS11 10.1" display is recommended.

The Nortac Defence Focus

Nortac Defence is the global leader for military Beyond-Line-of-Sight Blue Force Tracking (BFT) systems offering integrated end-to-end solutions. military/government organisations world-wide. Nortac's focus is to provide cost effective and quick reaction situational command and control to military organisations globally.
